## Certificate

My patient Mr. Bensingh John 29/M was a known diabetic for the past four years. His blood glucose level was not under control even after using Tresibha and he was under triple drug combination of Glimipride .2 mg, Metfarmin 500 mg and Voglibose 0.3mg. But suddenly he came with an ultimate sugar control of FBS with 115 mg/dl PPBS with 150 mg/dl. He got it control by using the product name **i- coffee** without taking any oral hypo glycemetic agents or Insulins. He is now with excellent glycemetic control, cheerful and has also gained a weight of 2 kg in a month. His past blood glucose level even after using insulin and OHA are FBS 198mg/dl and PPBS 248 mg/dl and without it went up to 300mg/dl. drkevin.eigviva@gmail.com
